Open House Agenda

November 15, 2012

**Understory Fuel Reduction in the Pine Creek Drainage
Red Rock Canyon National Conservation Area**

The Southern Nevada District, Office of Fire and Aviation, is proposing an understory fuel reduction in the Ponderosa pine stand in the Pine Creek drainage in Red Rock Canyon National Conservation Area. The purpose of the project is to protect the unique Ponderosa pine stand from being negatively impacted in the event of a wildland fire and to address the need for public safety. This meeting will part of the formal public scoping period for the Environmental Assessment (EA); comments will be accepted in writing at or before the presentation, and by mail until November 23, 2012. A link to the draft EA document may be found below:
